

ABBYY® FineReader® Server

What's New

Designed for high-volume document conversion, ABBYY FineReader Server automatically converts large collections of documents into searchable and accessible digital repositories. This server-based OCR and PDF conversion offering converts scanned and electronic documents into PDF, PDF/A, Microsoft Word, or other formats for search, long-term retention, collaboration, or additional processing—quickly, accurately, and automatically.

ABBYY Recognition Server 1.0, 2.0, 3.0, 3.5, and 4.0 are considered to be the previous versions of ABBYY FineReader Server. Recognition Server has been integrated into the FineReader software line.

What's New in FineReader Server 14

De-duplication

To optimize searches and avoid converting the same file more than once, ABBYY FineReader Server 14 R2 can now identify and skip duplicate files. This feature will both save system resources and the customers' page quota allowed by their license.

Webpage for OCR and Conversion

ABBYY FineReader Server 14 R2 includes a new web page where customers' employees can easily access a document conversion service, powered by ABBYY FineReader Server. Now customers' employees can convert documents directly in their browsers, without the need to install any additional components.

Compression & Barcode Improvements

- Improved MRC compression.
- New neural network for better barcode detection.

Other recent updates

Repository Audit

Provides reporting on found duplicates and number of searchable and unsearchable documents

Technical Drawings

Improved recognition quality for technical drawings

AI-powered OCR

- Chinese
- Japanese
- Korean
- Arabic

License withdrawal

Withdraw licensing from Indexing and Scanning stations in case of inactivity
